

PRESS RELEASE!

Data Logger Software

Multilingual Software supplied with their full line of data loggers is now offered in English, French, German, Italian, Spanish, Dutch, Polish, Swedish, and Chinese languages by MadgeTech, Inc. of Warner, New Hampshire.

LANGUAGE IS USER SELECTABLE

MadgeTech Data Recorder Software Version 2.00.60 now features an initial menu option to select English, French, German, Italian, Spanish, Dutch, Polish, Swedish, and Chinese. Developed to make data logger applications more user-friendly in those countries, the software provides customizable engineering units, real-time recording and alarming, overlaid graphs and annotations that can be customized, and easy export to MS Excel.

Effortlessly converting data into industry standard measurement units, MadgeTech Data Recorder Software Version 2.00.60 is supplied with the firm's full line of compact, battery-powered, intelligent, electronic data loggers for measuring and recording temperature, humidity, pressure, weather, and combinations of these parameters in many different environments.

MadgeTech Data Recorder Software Version 2.00.60 is supplied free with data loggers or can be downloaded from www.madgetech.com.
