

SYAR S.A. BACKS COMMITMENT TO QUALITY WITH MADGETECH

BACKGROUND

A Uruguayan company, SYAR S.A., has been dedicated to the sale of supplies and services to the industrial industry since 1968. Committed to providing high quality, end-to-end solutions to meet the needs of each sector, SYAR S.A. is an ISO 9001:2015 accredited company that calibrates under ISO 17025:2005 standards.

CHALLENGE

SYAR S.A. needed data loggers that could withstand working with temperature and pressure simultaneously, over time. Another requirement, the data loggers had to have a temperature resolution of 0.01 °C and low calibration uncertainty.

SOLUTION

To easily adapt to the many services they offer, SYAR S.A. purchased the MadgeTech **HiTemp140** high temperature data logger and the **PRTemp140** pressure and high temperature data logger.

Whether used during installation or calibration, the HiTemp140 and the PRTemp140 data loggers meet the outlined requirements. Both devices have a temperature resolution of 0.01 °C (0.018 °F) and come with an ISO/IEC 17025:2017 certificate from MadgeTech's in-house calibration laboratory, guaranteeing low calibration uncertainty.

SYAR S.A. now relies daily on the HiTemp140 to validate the calibration equipment they are working with.

For assistance finding the right data logging solution for your application, call us at (603) 456-2011 or email info@madgetech.com.
