

**Coronavirus Impact on MadgeTech, Inc.**

**March 03, 2020**

To Whom it may concern,

All of MadgeTech dataloggers and accessories originate from our facility in Warner, NH. The components that make up the majority of these devices originate from;

Steel components – Warner, NH  
Plastic components – Concord, NH  
PCB Assemblies – Warner, NH  
Probe assemblies – Warner, NH

Within our assemblies most components are sourced in the United States. Those components that originate in the Asia Pacific are principally stored in the United States, with more than enough inventory on hand to not disrupt our supply chain into the foreseeable future.

We have taken all necessary precautions to minimize any impact to our customers, distributors and employees.

Regards,

Dianne Moulton  
Quality Manager, MadgeTech, Inc.
